Nate Boscaljon for President!

Haters gonna hate, but Nater's  
gonna Nate!

# Nate Boscaljon— Haters gonna hate, but Nater's gonna Nate!

---

## Rules and Punishment at BVHS

Nate believes that students should be able to serve their Saturday School time before and after school during the week. This way, the students are still being punished, but it's not taking out of their athletic and other extra curricular events.

## Extra Curricular Activities

Nate wants to add a Sioux Falls Area Co-ed recreational basketball league within the school. The league would be similar to the YMCA's basketball league. By having it at the school, the opportunity would be available to more students.

He also would add a Brandon Valley Symphony. This would combine choir, orchestra, and band. The Symphony would also work as a fundraiser for the school.

## Class Offerings

If elected president, Nate would create a Zumba dance class. The class would encourage exercise, making it fun to work out.

## Improvements to BVHS

Nate will change the way our current lunch program works. There would be a "recess lunch period" for all grades freshman through seniors. During this period, students will be allowed to make appointments, go to the gym, lift weights, go home, or anything else they can get done in an hour.

## Food/School Lunch

Nate would improve school lunch by providing a mall-style food court. Different vendors would come in to offer more options to the students for lunch. The food court would also raise money for the school.

## Raising Money for the School

In between classes, Nate would like to provide a snack bar for the students to purchase little snacks to help tide them over through the day. The money raised by the snack bar would go towards the school.

## The National Debt/Deficit Spending

In order to decrease deficit spending, Nate would like to introduce a tax raise. He also wants to cut pork spending completely. This would allow us to save some of the money that is needlessly spent.

## Other National Issues

Gas prices are getting to be outrageously high. In order to cope with this issue, Nate would like to offer benefits to people buying fuel efficient vehicles. Nate would offer tax cuts to the people that buy these vehicles in order to preserve oil and help the economy.
